SERIES 97

# OUTSWING CASEMENT

SERIES 97

Skyline's Series 97 window provides exceptional performance with narrow and elegant sightlines that reference the aesthetic of historic steel sash windows. Designed for both retrofit and new construction, the Series 97 is appropriate for commercial and residential use. This window meets and exceeds today's demanding requirements through the use of structural glazing, Insulbar thermal-strut technology, and European style multipoint hardware; yielding superior air, water, thermal and acoustic results. Whether manufactured for a punched window or a window wall application, the Series 97 provides the design flexibility necessary to meet the aesthetic and performance requirements of your project.
